Violet and Her Dream Land

Violet is a little girl who has a dream world where everything works as per as she wants them

to be. She always tries to live in her dream world. Her dream world is very unique where she resembles

everything in a different way such as she would call the sun as egg yoke (as she is a food lover), park as

pasta, and so on..

One day she decided to give some unique names to all the days in a week such as she would call Saturday

as Sandwich, Sunday as Soup, Monday as Macaroon, Tuesday as Toffee, Wednesday as Waffles,

Thursday as Taco and Friday as French Fries.

She is facing trouble as she decided to give unique name for everything. She wants your help so that you

can remind her the names of the days in a week. Whenever she says a day you have to tell her the unique

name she has chosen for it.

Input

input contains string S, a day name.

Output

Print the corresponding unique name for the day as Violet decided.Example

Input:
Wednesday

Output:
Waffles
