Weekdays

This is probably one of the easiest problem,all you need to do is to output the name of the weekdays! The only challenge is that the size of your code, should not exceed the maximum of **55 bytes.**

Score is the length of the source.

Input

NONE

Output

Sunday
Monday
Tuesday
Wednesday
Thursday
Friday
Saturday

Please Note: I am moving this back to tutorial on 24th Nov 2010.
