

# Hard Problem

[This space is intentionally left blank.]

## Input

Multiple test cases. Each contains a single integer  $N$  ( $1 \leq N \leq 50$ ). Input terminates by EOF.

## Output

For each test case, output one line contains the answer. See the example.

## Example

Input:

8  
9  
10

Output:

$8=90*(0+0+0+0+45-3+20-42+60+10)$   
 $9=20*(0-3+10-14+15+2+0+0+0+0+10)$   
 $10=66*(0+0+0+0+0+33+5-33+66-66+55+6)$
