

# Find Me!

Develop a Python code to read a series of integers with 99 as a sentinel value

## Input

The sentinel value 99 can appear at the beginning, in the middle, in the end of a series of integers

## Output

If the sentinel value is at the beginning of the integer series, no integer will be displayed. If the sentinel appears in the middle or at the end of the integer series, all integers preceding the sentinel value in the series will be displayed. If the sentinel value is not in the list, all integer series will be displayed.

## Example

### Input:

1  
2  
88  
45  
99  
0  
12

### Output:

1  
2  
88  
45
